Crisp Digital are Certified Enfocus Partners, Authorised Resellers and Certified Solution Integrators!

## Professional Services

Crisp Digital offer a high level of professional services for Enfocus users including the configuration of Action Lists for use in PitStop Pro and PitStop Server and the development of complex workflows for use in Switch which are all intricately configured specifically for your way of working. Complex workflows can take several days to develop but can automate a huge array of tasks that will free up operator time and minimize errors. Good examples of this are the ability to automatically collect files from FTP and Email accounts, convert these files into PDF, preflight these PDFs, convert fonts to outlines, rotate and collate files, set trim and bleed boxes ready for proofing and imposing, automatically impose (using third party automated imposition software such as inPO2 by Dynagram), archive files into client/job directories, link directly with third party workflows, update database records, and much, MUCH more.

Order Code	Product Description	Price Ex VAT
PROSERV	Enfocus Professional Services	from £ 695.00

# Training & Support

## Training

Crisp Digital training is carried out by a fully qualified operators, with a working knowledge of applications that affect the prepress environment. To achieve maximum benefit, training is carried out on site. Trainees should be taken out of the working environment as much as possible and therefore the machine used for the training should be available for the duration. We encourage as much 'hands-on' learning from the trainees as possible, as it is felt this is the most effective way of learning the software. There is a basic path of training taken, outlined depending on which product is being trained.

Please see individual product listings for training bundles.

### Training

Order Code	Product Description	Price Ex VAT
TRAINING	Training per day for up to 2 people ( <b>travel expenses to be added</b> - please call for quotation)	£ 695.00 + travel
