

inp02

inp02: Imposition Solution For Adobe® Acrobat®

inp02 integrates powerful imposition technology within a familiar environment: Adobe® Acrobat®. This family of products offers all the key elements today's print professional look for. Editions and modules are available to create the solution that's right for you. From the simple wizard-driven approach to high-end planning, inp02 has everything you need to meet all your imposition needs.

HIGHLIGHTS

1. Scalable Product Family.

Start with a powerful entry level tool that can grow to match your printing and workflow needs based on the same intuitive interface.

2. Familiar Environment of Acrobat.

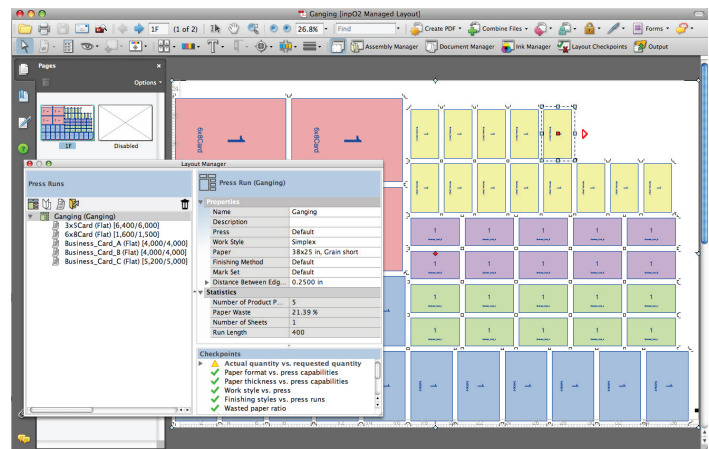

Get up and running quickly as inp02 is built right into Adobe Acrobat, a standard in today's production.

3. Imposition Flexibility.

Impose with ease, control and confidence — use the quick and intuitive Wizard for single document jobs, the Assembly Manager for complex multi-document layouts, automated ganging and planning, or the inp02 light table for total precision and control!

PRODUCT LINE

Modules	What is included
Wizard¹:	Basic 6-step wizard interface
Layout Editor:	Customization and fine-tuning options through inp02 Light Table
Assembly Planner:	Different approaches to build imposition assemblies in inp02
Optimization:	Automated ganging for flat work
Automation²:	Hot folders-based imposition for automated workflow
JDF Export:	JDF Export for layout and finishing

Ganging of jobs with inp02 Optimization Module.

¹ Sold through OEM bundles

² Available in Q2

inp02 **ADVANCED MODULES:**

Assembly Planner Module

- **Assembly Manager:** Convenient assembly-tree interface to impose projects requiring complex assemblies.
- **Planning Capabilities:** Post-press driven approach to imposition, using press, paper and finishing methods data.
- **Web Press Capabilities:** Easy-to-use interface to create complex layouts for single web, half-web multi-web, come and go or section stacking.
- **Professional Feature Set:** Complete page control, ink management, mark sets, checkpoints.

Optimization Module

- Simply import your jobs, enter quantities for each, and define your press run.
- Automatically gang as many jobs as needed on just about any press sheet size.
- Override the automated results by defining constraints, reordering products or modifying the press run.
- Take control on the inp02 Light Table and use special tools to modify the automated results.

Automation Module

- Drag and drop PDF files into a pre-defined hot folder to automatically impose your most common layouts.
- Use the Wizard interface to set-up any automated workflow independent of page size or page count. inp02 automatically adjusts the trim size and run length to match the incoming job specifications.
- Integrate inp02 into an existing managed workflow environment using the Hot folders to capture new jobs and direct completed layouts to the next workflow phase.

JDF Export Module

- Control over JDF data type and version.
- Export with cutting parameters for downstream finishing.
- Define output settings to integrate with your workflow.
