# OnTime Proof

Integrated Online Job Submission and Proofing for any Production Workflow!

Would you like to deliver your PreFlight Expert to your customer site the moment they are ready to send you a print job? Would you like to deliver your customer to your site the moment their job is ready to proof?

OnTimeProof with PDF Connect becomes part of your team! OnTimeProof with Post Rip Conversion Tools clones your proof into a virtual proof! PDF Connect™ clones your PreFlighting expert into a virtual PreFlighting expert!

Here's What You Get!

PDF Connect is a branded - client installable printer driver - that insures consistent quality production ready files are delivered to your doorstep from your clients. Configure your PDF Creation, Preflighting and Job Ticket requirements once - and then deliver this to many clients. Like sending out a specialized Preflight team to each of your customer sites.

The Production Conversion Tools work with a wide variety of "Post RIP" workflows to generate REAL PROOFS! Our "Heidelberg Delta Tool" generates Proofs from Ripped Delta Jobs! "TIFF-Pager" generates proofs from Ripped One Bit TIFF files! Make your Proofs from the same data you make your Plates with!

OnTimeProof Web Application lets you work in both real time and virtual time for job submission, automated production, and online proofing, saving money, reducing or eliminating errors, and keeping your customers coming back for more since you can deliver faster than anyone else!

OnTimeProof seamlessly wraps everything into a professional looking web application that maximizes your current online look and feel! Based on powerful "Best in Class" technology, SQL database, Tomcat Web Server, XML architecture and more, OnTimeProof can handle any level of business and can grow as you grow!
