

The perfect solution for color conversion of "raster images" found in a PDF file

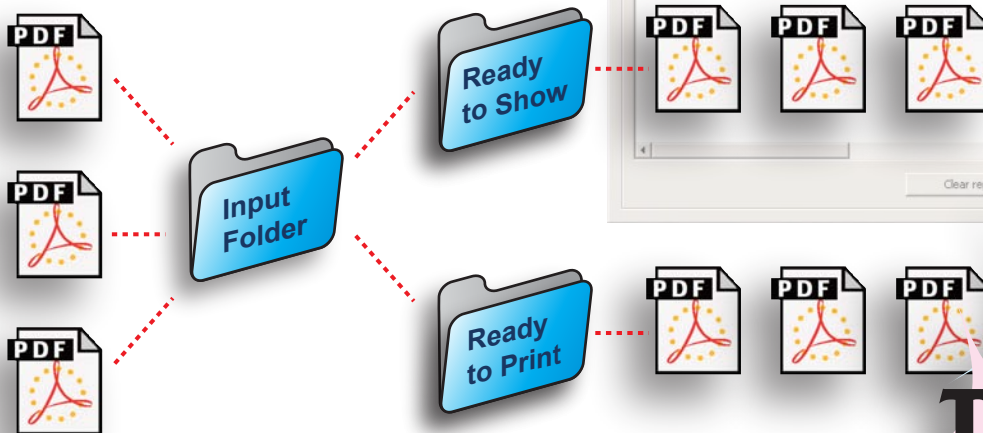

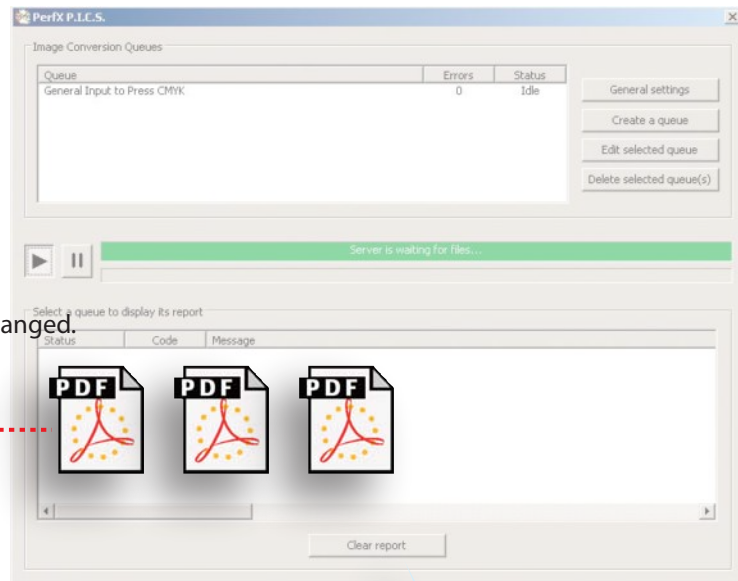

- ✦ You want to apply ICC profile only to the raster images included in a PDF file.
- ✦ You want to automate such type of color conversions.

YOU WANT A SOLUTION FOR ALL OF THE ABOVE?

PerfX Color Server PDF PICS™ is your solution!

Key features:

- Automates the color conversion process through predefined hot folders that will apply automatically any source and destination profiles and save the converted files to the desired directory.
- Many processing queues can be defined and used at the same time.
- Will convert only the raster images included in the PDF and will leave the vector and type elements unchanged.

Feature List

The perfect solution for color conversion of “raster images” found in a PDF file

General

- Available for Windows™.
- Compatible with PDF files created by most applications.

Features

- Recognizes and process “raster images” found in a PDF file.
- Support images using in RGB, CMYK and Grayscale color space, or having an embeded ICC profile.
- Conversion’s options are set for each individual input “hot folder”.
- Many color configurations can be set on a same server.
- Re-compression mode supporting ZIP, JPEG and uncompressed.
- Produces a report (succes or fail) about the processing of each PDF file.
- Grayscale images are converted using a dot gain curve profile.
- Choice for the rendering intent (Perceptual, Relative and Absolute Colorimetric and Saturation).
