

The best solution for press color control and reprints.

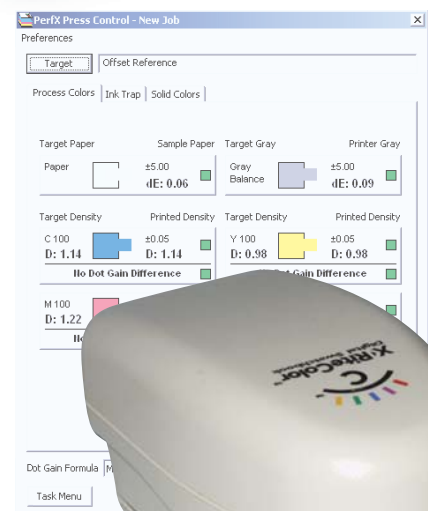

- ✦ Record your press standards and consult them as you wish.
- ✦ Record standards and specifications per job for all your jobs.
- ✦ Accurate and precise numerical press approval.

A must for your pressmen, they will no longer speculate on the press rendering results.

PerfX Press control™ the perfect solution for you!

Record standards and specifications per job and for all your jobs. With reading taken with your spectrophotometer, you will compare dot gain and ink saturation with the established standards. With all tolerances preset by the press people, you can then with a green or red light see at a glance which color needs to be adjusted to get to the result needed right away.
